PROJECTS

Medi-Queue — Smart Hospital Queue Management System | *Full-Stack Project*

Python, Flask, HTML | github.com/Angels-22/Medi-Queue

- Built a full-stack healthcare queue system enabling patients to book appointments and track live queue status in real time.
- Developed backend logic and API routes in Python using Flask; built the front end with HTML for a smart-hospital use case designed for modern Indian hospitals.
- Implemented real-time queue status updates to reduce patient wait-time uncertainty and improve appointment flow.

INTERNSHIPS

Ethical Hacking & Cyber Security | *Hack-up Technology 2025*

- Completed a virtual internship covering cybersecurity fundamentals, threat identification, and ethical hacking techniques.
- Gained hands-on exposure to security assessment concepts and defensive best practices.

Full Stack Development | *Ether Services 2026*

- Worked on full-stack development tasks, strengthening practical experience across front-end and back-end technologies.
- Collaborated on building and testing web application features end to end.
